

Genesis Global Executive Search For Both Retained and Contingent Recruitment

Finding the right people, and managing your workforce, is the hardest thing to do. Genesis Global has a recruiting approach to match your permanent placement recruiting requirements, from contingent to retained to hybrid searches. But no matter which approach you choose, Genesis will be your partner throughout. With our white-glove approach, we first work to understand the unique needs of your company and create a customized approach based on our integrated platform. We have candidate identification support from over 50 specialized staffing firms nationwide that is seamless to you. This allows us to cover larger areas of different job experience needs to fill your openings faster.

Optimize the Recruitment Process

Additionally, since we have a broad base of technical knowledge in our Professional Group division, our team of SMEs provides qualified candidates from their networks and are also part of the interview pre-screening process. This unique approach generates more qualified applicants, saving your hiring managers the time and frustration of weeding through the far less qualified applicants they might receive from a typical non-practicing, non-experienced general recruiter.
